

We are the 99%

While the rest of us suffer through a worldwide economic crisis, the people at the top are just getting richer. For the rest of us, nothing's getting better: the Government is cutting hospitals and libraries, rolling back social services, shutting down buses and selling our land to the highest bidder. The wealth that it takes to get us out of this mess is right in front

of us—we know because we are the ones who created it. We fly the planes, nurse the sick, crunch the numbers, grow the food, and keep this society running. All the wealthiest do is sit there and watch their money make more money.

We are the 99% and we are more powerful than they'll ever be.

What are you protesting about?

We want to see a change in how our world, our country, our city is run; but everyone has their individual story. We have different opinions, and are not affiliated to any political party. There are many solutions. We will hold talks and discussions on where we go from here, to learn and inform.

Please join us.

Why Sheffield?

The economic crisis and the actions of the powerful affect everyone. In Sheffield a third of the city are in poverty, while the richest have gained massively over the past few years. This isn't just a London issue, this is for all of us to make a stand.

How do I get involved?

We welcome support and your involvement. To keep up with what is happening, go to:
